

Building Power Teams

So much that we need to accomplish *cannot* be done without the benefit of *teamwork*. Yet teamwork does not develop *on its own*. We must **plan** for it, **invest** in it, and provide **opportunities** for it to develop. *Is your team doing that?* During this day we'll actually **DO** teamwork, and watch the learning happen automatically. This extremely interactive and fun day is filled with incredible "AHA!" moments, as participants discover for themselves the awesome power of the team. We'll include ways to address specific team challenges your team is facing.

Experience:

- The value of developing team relationships
- Synergistic problem solving, utilizing several interesting challenges for your team to work on together. *You can't solve it without the team!*
- "The Spider Web" – a real TEAM problem. You'll think you can't, but you CAN and WILL!
- A truly CONSTRUCTIVE team experience that will leave you convinced of the value of teamwork.
- The value of TRUST in teamwork – an amazing and POWERFUL experience designed to build trust in your team, and your *willingness* to trust your team.
- Putting yourself on the line for your team
- Discovering more answers to teambuilding challenges than you ever thought possible.

This *highly interactive*, fast paced full day experience, experienced in a team environment, will change your view of teamwork, and give you a wide variety of tools to create more effective teams at work.

One of the most *experiential* programs we offer, sure to convince even YOU that teamwork is worth the effort! More experience, less talking, more learning!
